

Refined Glycerine 99.7% Min – Specification

Property	Unit	Method	Result
Appearance	–	EP 11	Clear, Colorless or Almost Colorless
Appearance of Solution	–	EP 11 2.2.1/2.2.2	The solution is colourless
Odour	–	–	Odourless, Slight Characteristic Odour
Color (Alpha)	APHA	ISO 2111	< 5
Relative Density (20°C)	gr/cm ³	EP 2.2.5	1.2628
Glycerine Content (Assay)	%	EP 11	99.87
Sulphate Content (as SO ₄)	ppm (mg/kg)	TS 829	Max 10
Ash	%	TS 829	< 0.001

Refined Glycerine 99.7% Min is a high-purity grade glycerine produced through advanced refining processes. It appears as a clear, colorless, and almost odorless liquid with excellent hygroscopic and solvent properties. Because of its high quality and consistency, it is widely used in **pharmaceutical, food, cosmetic, personal care, and industrial applications**.

Our product complies with international standards and meets strict specifications to ensure reliability and safety. The data below highlights the key properties and test results of Refined Glycerine 99.7% Min.
